India

Dear Whoever it may concern,

The pE-300 Series LED illumination unit from CoolLED has many applications in fluorescence microscopy. The product provides a choice of three LEDs covering wavelengths between approximately 400 nm and 650 nm.

The pE-300<sup>white</sup> allows control via a manual pod, or via USB which allows usage from a variety of microscope software packages, or via a single global TTL allowing for rapid acquisition.

Your sincerely,

Christopher Deeks  
Field Sales Manager, India
