

National Institute of Mental Health and Neuro
Sciences (NIMHANS), Bangalore - 5600029

Have you experienced brain stroke in the last six months?

Doctors from the Dept of Neurology NIMHANS, have undertaken a research project on upper limb rehabilitation for stroke patients, funded by ICMR across 2 centres in India. Participants will be evaluated for upper extremity weakness and given treatment for the same.

You May Qualify If You

- Are between 18 and 70 years old
- Had a **first ever stroke** in the last 6 months
- Are having hand weakness which is affecting your performance in daily activities

Potential Benefits

Participating in this study may improve your upper limb strength and performance in activities of daily living.

Participation Involves

- Attending therapy sessions three times a week for three months (A total of 36 sessions).
- Therapy session will go on for 1 hour.
- Therapy session will involve either virtual reality gaming sessions, or occupational therapy rehabilitation for upper extremity.

Location: NIMHANS, Bangalore
